Save your stuff. Get Surge Protection.

A single bolt of lightning can contain 200 million volts of electricity that can travel through your electrical wiring, cable, satellite or telephone lines directly into your home, leaving you with damaged or destroyed appliances and electronics.

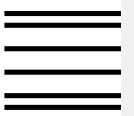

But you can save yourself from that frustration and expense with Surge Protection from the City of Winter Park. With our two-stage approach of a meter-base protector combined with premium plug-in protectors, you'll enjoy the highest level of security possible for your stuff – and your peace of mind.

Stage one: Save your appliances

Start with our Meter-Base Protector. This is installed directly behind your electric meter to safeguard major appliances such as refrigerators and HVAC systems.

Stage two: Save your electronics

Next, add on our premium Plug-In Protectors. These units are up to six times stronger than many found in retail stores and provide a second line of defense for sensitive electronics such as computers and home entertainment systems.

Power protection specifications

Meter-Base Surge Protector

- Surge Protection Device (SPD) Type 1
- Initial clamping voltage – 240 volts
- Safety fused
- Joule rating – 4,000 Joules (2,000 per phase)
- Withstands surge current to 40,000 amps
- Indicator lights

PM8-AV Eight-Outlet Multimedia Power Strip Protector

- UL 1449 listed
- HDTV compatible
- Thermal safety fused
- Response time less than one nanosecond
- Diagnostic indicator lights
- Multistage hybrid design
- Can handle six times the surge energy required to meet the minimum UL standards
- Completely shielded video protector meeting all FCC and cable requirements
- Telephone line (RJ-11) protection included
- Satellite/cable coax line protection included
- 10-year manufacturer's warranty

Universal 1206 Six-Outlet Swivel Protector

- UL 1449 listed
- HDTV compatible
- Thermal safety fused
- Response time less than one nanosecond
- Diagnostic indicator lights
- Multistage hybrid design
- Can handle six times the surge energy required to meet the minimum UL standards
- Completely shielded video protector meeting all FCC and cable requirements
- Computer network (RJ-45) protection included
- Telephone line (RJ-11) protection included
- Satellite/cable coax line protection included
- 10-year manufacturer's warranty

Meter-Base Protector

Protects: Major appliances such as air conditioning and heating systems, washers, dryers and refrigerators.

Features: Withstands surge currents of up to 40,000 amps. The Meter-Base Protector offers the first stage of protection against power surges by diverting the largest portion of the surge into the ground.

Installation: Installed by a licensed electrician.

Cost: One-time installation fee of \$44.95 plus tax and a \$5.95 monthly maintenance fee plus tax.

Grounding

A vitally important – but often overlooked – aspect of surge protection is grounding.

Installation of our Meter-Base Protector by a licensed electrician includes a free outdoor electrical grounding inspection and any necessary grounding repairs.

PM8-AV Multimedia Power Strip Protector

Protects: Your home entertainment center, home office, advanced computer systems, cable and satellite TVs, modems and fax lines. The PM8-AV has eight widely spaced receptacles making it easy to accommodate multiple devices.

Features: Multistage unit stops surges at the lowest level even at the highest test standards. Automatically disconnects output power if damaged by a surge and won't allow secondary surges to damage your equipment. It includes common and normal mode protection, nanosecond reaction time, a multifunction indicator and a special thermal safety feature that activates in the unlikely event of internal component failure. An indicator light confirms protection is operational, the outlet is powered and phased correctly, and the safety ground is present at the outlet. Comes with extension cables for video, phone and satellite applications. Easily accommodates battery charger or adaptor units.

Installation: Simply attach the equipment you want to protect and plug in.

Cost: \$79 plus tax

Universal 1206 Six-Outlet Swivel Protector

Protects: Sensitive computer and telecommunications equipment such as computers with high-speed cable Internet access, answering machines, fax machines, televisions, VCRs and DVD equipment. Includes protection for computer networks, phone lines, cable and satellite applications.

Features: Unique swivel design offers cord flexibility by allowing plugs to be positioned in front or to the side of the protector. The swivel protector offers specially designed elements for more protection against power surges. Automatically disconnects output power if damaged by a surge and won't allow secondary surges to damage your equipment. It includes common and normal mode protection, nanosecond reaction time, a multifunction indicator and a special thermal safety feature that activates in the unlikely event of internal component failure. An indicator light confirms protection is operational, the outlet is powered and phased correctly, and the safety ground is present at the outlet. Comes with extension cables for video, phone and satellite applications.

Installation: A simple six-outlet plug-in device you can install yourself.

Cost: \$79 plus tax
