Generator KW capacity \_\_\_\_\_ Electrical service size \_\_\_\_\_ Over-current protection capacity \_\_\_\_\_

#### Generator location and setback compliance limitations: *(Select appropriate installation location below)*

- The generator is to be located in a front or side yard with street frontage 10 feet any property line or 6 feet from any property line and a letter from the adjacent neighbor has been submitted with the permit application. In addition, the generator will be totally shielded from view by shrubbery, wall or fence prior to the final inspection approval.
- The generator is to be located in a side yard setback, 6 feet from the adjacent property line and a letter from the adjacent neighbor approving of the location has been submitted with the permit application. In addition, the generator will be totally shielded from view by shrubbery, wall or fence prior to the final inspection approval.
- The generator is to be located in the rear setback, 10 feet from the rear and side yard property lines and will be totally shielded from view by shrubbery, wall or fence prior to the final inspection approval.
- The generator is placed 10 feet from the rear property line and 6 feet from the side property line and a letter from the adjacent neighbor approving of the location has been submitted with the permit application. In addition, the generator will be totally shielded from view prior to the final inspection approval.

I \_\_\_\_\_ have read and agree to comply with the above guidelines. Date \_\_\_\_\_
